

StormWise DI2: Official Audit Artifact

Winter Storm Event: January 17, 2026

Location: Exton, PA (19341)

Final Deterministic Outcome:

- Measured total: 1.3 inches (deck, scroll-sealed)
 - Primary deck measurement: 11:23 AM (main audit), snow tapered by noon
 - Temperature: 30-31F, below freezing entire event
 - Surface: Deck: 1.0-1.3 inch; Grass: nearly covered; No melt/compaction
 - Radar: Main snow band tracked west to east, exited shortly after main measurement
-

Protocol & Audit Status:

All observations are scroll-sealed and supported by timestamped photos and direct measurement. Forecast range (1.0-1.3 inch) was met with no audit violations. No revision required. Artifact is chain-of-custody compliant and export-ready per DI2 protocol.
